1. Is a pre-bid site visit and meeting planned?

   ***The Using Agency is not planning to hold a pre-bid site visit or meeting.***

2. What is the rail section through the grade crossing?

   ***The current rail section is comprised of a rubber surface and the current rail weight is 133 lb/yd.***

3. Will the new rail section through the grade crossing match the existing?

   ***Yes, with concrete panels instead of rubber or any other type of surface.***

4. Will the new grade crossing panels match the existing or will precast concrete grade crossing panels be acceptable?

   ***Precast concrete grade crossing panels are acceptable.***

5. The existing grade crossing appears to be approximately 55' in total length, will the new grade crossing need to match the existing length or can it be slightly longer?

   ***Yes, the crossing can be longer.***

6. The existing grade crossing appears to be approximately 9' in total width, will the new grade crossing need to match the existing width or can it be slightly wider?

   ***Yes, it can be wider with the new concrete surface.***

7. The current industry standard for railroad crossings is 10' hardwood X-ties, spaced at 19.5" O.C. and 10' wide concrete panels. Is this the standard that should be met?

   ***Please follow the cited industry standard.***

8. The existing crossing has standard tie plates, spiked down. The recommended installation would be to use Pandrol plates, lag screwed to the ties. Should we proceed with a cost based on this recommended installation?

   ***Please bid considering the use of Pandrol plates, lag screwed to the crossties.***

9. The existing crossing has an asphalt approach on one side and a concrete approach on the other. There will be a gap that will need to be patched back on both sides after constructing the crossing. Should we assume we will patch back at least a 20" wide asphalt approach on each side of crossing?

   ***Please bid considering the need for an asphalt patch of at least 20" in width on the approach to each side of the crossing.***

10. Does this project include any grade crossing warning device installation or improvements? IE: flashing lights or gates?

    ***No improvements to the existing highway-rail grade crossing protection (lights and gates) are part of the scope of this project. Any contractor-caused damage to the existing equipment arising from the scope of this work will be repaired at no cost to the Owner.***
