Our Company

TELEDATA Technologies, NETWORX, Inc. and **COMWORX, Inc.**, are three separate technology companies operating under one great brand to serve as your complete technology solution provider. With our unique setup, we provide **engineering, installation and support** for **voice, data, fiber, audio/visual, security and life safety solutions**. With an unlimited bid license we have completed hundreds of projects throughout Nevada and California. Our management team has deep roots from mutual past experiences and our trained and certified technical staff provides our clients with the most advanced and cutting edge technology available.

Technology that works.
Answers you can understand.

You need technology for what it delivers to your business.

We focus on resolving your issues with answers that make your employees more productive and your business more effective.

You can count on us to provide pragmatic solutions that contribute to your success.

In a World of Technology, People Make the Difference

Five Reasons we move your business forward:

1. **We don't say it, we do it.**
2. **We're your clarity in the midst of complexity.**
3. **We make your technology better than before.**
4. **We go beyond the status quo.**
5. **We keep your systems up and your networks running.**
