Mr. Gideon Davis,

Purchasing Office, State of Nevada

Re: 3490 – Oracle Identity and Access Management Upgrade

Dear Mr. Davis:

We are pleased to present our response for the "Oracle Identity and Access Management Upgrade RFP" for the State of Nevada. The Speridian team would like to thank you and State for this opportunity.

Speridian is an Oracle Platinum Partner that brings significant depth and experience in implementations in Health & Human services. Over the past decade, Speridian has implemented leading case management, SOA and Identity Management solutions that have made a positive impact for our clients by improving customer interaction, and improving operational efficiency, while significantly reducing the client's overall IT support and maintenance expense.

In the Public-Sector Systems Integration space, Speridian played an integral role in the success of Medicaid modernization for the State of Hawaii and the Health Exchanges at Connecticut and New York. Our references include KPMG for the State of Hawaii, the State of Oregon and the State of Vermont.

Our proposal provides the State with a plan to upgrade their Identity management stack together with a warranty support period to address any further challenges. The technical proposal and the cost proposal are included in this drive along with this cover letter. The technical proposal also includes a roadmap of improvements the State can take advantage of, once the upgrade is completed.

We bring significant experience in working with the Oracle based Identity and Access Management technology stack at Nevada and we look forward to helping upgrade the environment.

Sincerely,

Ali Hasan
Chief Operating Officer
Speridian Technologies LLC
