Greg Smith
 Administrator

SUBJECT: Amendment No. 1 to Request for Proposal No. 1995
 DATE OF AMENDMENT: August 31, 2012
 DATE OF RFP RELEASE: August 15, 2012
 DATE AND TIME OF OPENING: September 19, 2012 @ 2:00 P.M.
 AGENCY CONTACT: Teri Smith, Procurement Staff Member

The following shall be a part of RFP No. **1995** for **Fire Fuels Reduction Services**. If a vendor has already returned a proposal and any of the information provided below changes that proposal, please submit the changes along with this amendment. You need not re-submit an entire proposal prior to the opening date and time.

1. Can you provide the prior pricing for the contractors who were awarded this contract?

All of the documents can be downloaded from our website at [http://purchasing.state.nv.us/Fire Fuels/Fuels.htm](http://purchasing.state.nv.us/Fire_Fuels/Fuels.htm)

Pricing is contained in the attachments to the contracts labeled Contractor's Response.

2. RFP Section 1.1.3: There are 9 different scopes of work identified in section 1.1.2. If, for instance, vendor wants to bid on 3 different scopes of work, must vendor submit 3 separate packages, with each addressing a particular scope of work, and including the rest of the redundant information that will be the same in each master binder? Or, is only one package required (with correlating copies) for each vendor, regardless of the number of scopes of work on which the vendor bids?

Section 1.1 of the RFP is Goals and Objectives, and is a summary of the scopes of work. The scopes of work are detailed in Section 3 of the RFP. Only one package is required from each vendor (with correlating copies). The individual scopes of work that the vendor is responding to should be separated by tabs in the appropriate section of the response (as per section 9.2.2.6 of the RFP).

3. What are the "minimum requirements that the successful bidder must meet" as referenced in NRS 333.335(3)(b) and NRS 333.311?

Minimum requirements as are detailed in the RFP.

4. How can we obtain from you samples of what you consider to be “proper” proposals and/or winning proposals that we could use to assist us in preparing our proposal?

All statewide contracts are posted on our website at http://purchasing.state.nv.us/services_index.htm or you can submit a public records request for specific contract information.

5. Are there any other guidelines or written materials that the State would recommend in helping a vendor prepare the proposal?

Please visit our website at http://purchasing.state.nv.us/pur_info/tipsrfp.htm for 10 Tips for a Successful RFP Response.

6. In section 3.3.2.2, the State describes Brush masticators as “light, medium and heavy duty”. Please give more guidance on what falls under each of those qualifications, i.e. what size equipment and/or horsepower range falls within each of those designations.

A light masticator is defined as a wheeled or tracked vehicle having up to a 150 HP engine capable of supplying simultaneous power to the wheels/tracks and to all hydraulics. The light masticator can be equipped with a hydraulically or PTO operated rotary mastication head or a flail type power head. Both types of masticator must be capable of masticating brush and small trees up to 6 inches in diameter.

A medium masticator is defined as a wheeled or tracked vehicle having between 150 and 350 HP engine capable of supplying simultaneous power to drive components, all hydraulics, and to the masticator head. The medium masticator can be equipped with a hydraulically operated rotary masticator head or flail type power head. Both types of power heads must be capable of masticating brush and trees up to 12 inches in diameter.

A heavy masticator is defined as a wheeled or traced vehicle having between 350 and 600+ HP engine capable of supplying simultaneous power to the wheels/tracks and to all hydraulics. The heavy masticator can be equipped with a hydraulically operated rotary masticator head or a flail type power head. A heavy masticator is fully capable of masticating trees up to 20 inches in diameter and virtually all forest and range shrubs found in Nevada.

All masticating equipment will be equipped with a Roll-Over Protection System and a Falling Object Protection System.

7. In section 3.3.2.2, the State describes Brush masticators as “light, medium and heavy duty”. Does vendor decide which mastication equipment will be used on each job? What factors does the State consider in the selection of which mastication equipment to use?

The vendor can make recommendations based on past experiences in different terrains and job specifics. If the state agency requesting bids want a specific type of masticator, that will be specified in each individual project bid. The State will then consider such factors as fuel type, topography, soil impact, proximity to water

sources, and others as specified in each individual project plan when bidding for equipment.

8. Are there any special technical formatting directions for the CDs?

No. The CDs must contain the information as outlined in Section 9 of the RFP.

9. Section 9.2.2.6 says that, “Written responses must be in bold/italics and placed immediately following the applicable RFP question, statement and/or section.” What is the response information the State is looking for? There are no questions; rather just defined scopes listed. So, what “response” information is desired there?

Section 9.2.2.6 is referring to the vendor’s response to the Scope of Work identified in Section 3 of the RFP. Vendors must acknowledge each question, statement and/or section in some way. A response to each question, statement and/or section is important because this is where the vendor will demonstrate and be scored on capabilities, experience, etc., for each specific scope as outlined.

ALL ELSE REMAINS THE SAME FOR RFP 1995.

Vendor shall sign and return this amendment with proposal submitted.

RFP 1995 Amendment 1

<p>This document must be submitted in the “State Documents” section/tab of vendors’ technical</p>
--

ATTACHMENT A – CONFIDENTIALITY AND CERTIFICATION OF INDEMNIFICATION

Submitted proposals, which are marked “confidential” in their entirety, or those in which a significant portion of the submitted proposal is marked “confidential” **will not** be accepted by the State of Nevada. Pursuant to NRS 333.333, only specific parts of the proposal may be labeled a “trade secret” as defined in NRS 600A.030(5). All proposals are confidential until the contract is awarded; at which time, both successful and unsuccessful vendors’ technical and cost proposals become public information.

In accordance with the Submittal Instructions of this RFP, vendors are requested to submit confidential information in separate binders marked “**Part I B Confidential Technical**” and “**Part III Confidential Financial**”.

The State will not be responsible for any information contained within the proposal. Should vendors not comply with the labeling and packing requirements, proposals will be released as submitted. In the event a governing board acts as the final authority, there may be public discussion regarding the submitted proposals that will be in an open meeting format, the proposals will remain confidential.

By signing below, I understand it is my responsibility as the vendor to act in protection of the labeled information and agree to defend and indemnify the State of Nevada for honoring such designation. I duly realize failure to so act will constitute a complete waiver and all submitted information will become public information; additionally, failure to label any information that is released by the State shall constitute a complete waiver of any and all claims for damages caused by the release of the information.

This proposal contains Confidential Information, Trade Secrets and/or Proprietary information as defined in *Section 2 “ACRONYMS/DEFINITIONS.”*

Please initial the appropriate response in the boxes below and provide the justification for confidential status.

ATTACHMENT C – VENDOR CERTIFICATIONS

Vendor agrees and will comply with the following:

- (1) Any and all prices that may be charged under the terms of the contract do not and will not violate any existing federal, State or municipal laws or regulations concerning discrimination and/or price fixing. The vendor agrees to indemnify, exonerate and hold the State harmless from liability for any such violation now and throughout the term of the contract.
- (2) All proposed capabilities can be demonstrated by the vendor.
- (3) The price(s) and amount of this proposal have been arrived at independently and without consultation, communication, agreement or disclosure with or to any other contractor, vendor or potential vendor.
- (4) All proposal terms, including prices, will remain in effect for a minimum of 180 days after the proposal due date. In the case of the awarded vendor, all proposal terms, including prices, will remain in effect throughout the contract negotiation process.
- (5) No attempt has been made at any time to induce any firm or person to refrain from proposing or to submit a proposal higher than this proposal, or to submit any intentionally high or noncompetitive proposal. All proposals must be made in good faith and without collusion.
- (6) All conditions and provisions of this RFP are deemed to be accepted by the vendor and incorporated by reference in the proposal, except such conditions and provisions that the vendor expressly excludes in the proposal. Any exclusion must be in writing and included in the proposal at the time of submission.
- (7) Each vendor must disclose any existing or potential conflict of interest relative to the performance of the contractual services resulting from this RFP. Any such relationship that might be perceived or represented as a conflict should be disclosed. By submitting a proposal in response to this RFP, vendors affirm that they have not given, nor intend to give at any time hereafter, any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor, or service to a public servant or any employee or representative of same, in connection with this procurement. Any attempt to intentionally or unintentionally conceal or obfuscate a conflict of interest will automatically result in the disqualification of a vendor’s proposal. An award will not be made where a conflict of interest exists. The State will determine whether a conflict of interest exists and whether it may reflect negatively on the State’s selection of a vendor. The State reserves the right to disqualify any vendor on the grounds of actual or apparent conflict of interest.
- (8) All employees assigned to the project are authorized to work in this country.
- (9) The company has a written equal opportunity policy that does not discriminate in employment practices with regard to race, color, national origin, physical condition, creed, religion, age, sex, marital status, sexual orientation, developmental disability or handicap.
- (10) The company has a written policy regarding compliance for maintaining a drug-free workplace.
- (11) Vendor understands and acknowledges that the representations within their proposal are material and important, and will be relied on by the State in evaluation of the proposal. Any vendor misrepresentations shall be treated as fraudulent concealment from the State of the true facts relating to the proposal.
- (12) Vendor must certify that any and all subcontractors comply with Sections 7, 8, 9, and 10, above.
- (13) The proposal must be signed by the individual(s) legally authorized to bind the vendor per NRS 333.337.

ATTACHMENT K – CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

- (1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
- (2) If any funds other than Federally appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award documents for all sub awards at all tiers (including subcontracts, sub grants, and contracts under grants, loans, and cooperative agreements) and that all sub recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED COMBINED FORM

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

This endorsement changes the policy effective on the inception date of the policy unless another date is indicated below.

Endorsement Effective: 04-01-2012	Policy Number: P0009-103530-06
Named Insured: Bordges Timber, Inc.	Countersigned by: 
	(Authorized Representative)

"Who is an insured" (Section II) is amended to include as an insured only those categories of person(s) or organization(s) described below in paragraphs A, B and C with whom you are obligated by a written contract or written agreement to provide insurance such as is afforded by this policy, but only with respect to the Additional Insured's vicarious liability for your negligent acts or omissions in connection therewith and subject to the following:

- A. If the Additional Insured is a lessor of leased equipment this insurance does not apply:
 - (1) To any "occurrence" which takes place after the equipment lease expires.
- B. If the Additional Insured is the manager or lessor of premises or land which is leased, rented or loaned to you, this coverage applies only as respects to liability arising out of the ownership, maintenance, or use of that part of the premises or land leased, rented or loaned to you. However this insurance does not apply to:
 - (1) Any "occurrence" which takes place after you cease to be the tenant in or on that premises.
 - (2) Structural alterations, new construction or demolition operations performed by or on behalf of the Additional Insured.
- C. If the Additional Insured is an Owner, Lessee or Contractor, this coverage applies only with respect to liability caused by operations performed directly by you and/or your employees, for the Additional Insured at a location designated in a written contract or agreement.

It is further agreed that no coverage is afforded or extended by this endorsement for any claims arising out of the negligence or willful misconduct of the Additional Insured.

It is further agreed that we will not be responsible for the payment of attorney's fees and costs in the defense of the Additional Insured that are attributable to claims that do not fall within the coverage of this endorsement, and we have the right to allocate the payment of attorneys fees and costs between covered and uncovered claims at any time, including upon accepting the Additional Insured's tender of defense.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED – COMBINED FORM - AUTOMOBILE

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM
MOTOR CARRIER COVERAGE FORM
TRUCKERS COVERAGE FORM

This endorsement changes the policy effective on the inception date of the policy unless another date is indicated below.

Endorsement Effective: 04/01/2012	Policy Number: P0009-103530-06
Named Insured: Bordges Timber, Inc.	Countersigned by: 
	(Authorized Representative)

"WHO IS AN INSURED" (Section II) is amended to include only those categories of person(s) or organization(s) described below in paragraphs A, B, and C with whom you are obligated by a written contract or written agreement to provide insurance such as is afforded by this policy, provided such persons or organizations are a lessor of leased autos, engaged in the operations of a shipper or trucker, or a State or other political subdivision, and subject to the following:

- A. If the Additional Insured is a lessor of leased autos this insurance does not apply:
- (1) To any "occurrence" which takes place after the equipment lease expires, or when the lessor or his or her agent takes possession of the "leased auto", whichever occurs first.
- B. If the Additional Insured is engaged in operations as a "Shipper" or "Trucker", coverage afforded by this policy shall only apply as respects to liability arising out of hauling done by the Insured for the Additional Insured.
- C. If the Additional Insured is a state or other political subdivision:
- (1) This insurance applies only with respect to operations performed by you or on your behalf for which the state or political subdivision has issued a permit.
 - (2) This insurance does not apply to "bodily injury", "property damage" arising out of operations performed for the state or political subdivision.

The insurance afforded to the Additional Insured is only with respect to the Additional Insured's vicarious liability for your negligent acts or omissions. No coverage is afforded or extended by this endorsement for any claims arising out of the negligence or willful misconduct of the Additional Insured.

It is further agreed that we will not be responsible for the payment of attorney's fees and costs in the defense of the Additional Insured that are attributable to claims that do not fall within the coverage of this Endorsement, and we have the right to allocate the payment of attorney's fees and costs between covered and uncovered claims at any time, including upon accepting the Additional Insured's tender of defense.

As used in this endorsement:

"Trucker" means any person or organization engaged in the business of transporting property for hire by "auto".

"Shipper" means any person or organization who hires, contracts or directs a "Trucker" to transport property for or on their behalf.

Tab V – Attachment B

ATTACHMENT B – TECHNICAL PROPOSAL CERTIFICATION OF COMPLIANCE

WITH TERMS AND CONDITIONS OF RFP

I have read, understand and agree to comply with the terms and conditions specified in this Request for Proposal.

YES X I agree to comply with the terms and conditions specified in this RFP.

NO _____ I do not agree to comply with the terms and conditions specified in this RFP.

In order for any exceptions and/or assumptions to be considered they **MUST** be documented in detail in the tables below. The State will not accept additional exceptions and/or assumptions if submitted after the proposal submission deadline. Vendors must be specific. Nonspecific exceptions or assumptions may not be considered. If the exception or assumption requires a change in the terms or wording of the contract, the scope of work, or any incorporated documents, vendors must provide the specific language that is being proposed in the tables below.

Tab VI – Scope of Work

RFP 1995 Technical Approach

The task order received by Bordges Timber Inc will be read and reviewed by Tim Bordges. An on site visit will be made, during this visit we will look at tasks to be performed, i.e.; mastication , fuel removal, tree removal, chipping or grinding, clearing, seeding or whatever else would be asked to be done.

We look for project boundaries, environmental concerns, i.e.; archaeological sites, streams, stream areas, ephemeral and intermittent streams which might be effected by projects use of equipment , i.e.; noise, dust , access points to site, soil conditions and hazards that might occur while performing the task needed. Safety is greatly valued by Bordges Timber, Inc. Tim Bordges would address what methods, manpower and equipment would be used.

The project would start immediately upon the completion of all contractual obligations and conditions between the vendors and contracting officer. We will then request a pre operations meeting to discuss production rates and particulars of project depending on type of project. Usually we post safety signs, haul equipment to project site, have a meeting with crew to discuss hazards and job outline, boundaries of project and other sensitive measures needed to perform project.

Bordges Timber Inc. has experienced crews available to perform fuel reduction tree thinning or wildlife habitat improvement as well as erosion control skills, highly skilled people have performed work for Plumas Fire Safe Council, White Hawk fuel reduction and Nevada fire safe council sewer treatment project in Zepher Cove both of these projects required whole tree removal log processing, top grinding and removal as well as mastication. Bordges Timber Inc. has the capabilities of chipping, grinding, piling of slash, and hauling of products, i.e. chips, slash, logs or firewood. We have timber fallers for trees that cannot be harvested by mechanical means, having worked for Pacific Gas & Electric downing hazard tree removal on Highway 50 summer home tract and numerous projects on Interstate 80 and Highway 20. Larry Reagen and Paul Mayben were the managers from Pacific Gas and Electric. We have done trees at Ice House Reservoir, Union Valley and Sacramento Municipal Utility District (SMUDA) campground in the Pacific Ranger district of El Dorado National Forest. We have made bear dens at Forest Hill Ranger Station District out of long butts available from timber harvesting. Bordges Timber has done machine piling for Sierra Pacific Industries from 1994-2001. Using dozers with brush rakes we averaged 600 acres per year. We had a project in Tahoe National Forest piling brush called Rock Pile which we sub-contacted for Paul Roen Company of Sierraville, CA.

Bordges Timber has been fire fighting with dozers, water trucks for many years with the USFS, BLM and Cal Fire. We have years of hot line and fire line repair experience Our mobilization is based on an hourly rate and not by mileage because of extra legal width and weights. Some pieces of equipment require pilot cars and the unknown distance to projects. Bordges Timber is proposing to achieve fuel reduction, tree-thinning wildlife habitat improvement and erosion control with equipment and man power. There are some things that manpower still has the upper hand in.

We will request a pre-operations meeting to discuss production rates, road work, and any other issues of concern. We intend to proceed from that point in flagging skid trails and landings. At the same time we will have a Cat 722, Faller buncher with bar saw and skid steer with 14" shear begin falling and begin falling appropriate timber and sub murch, placing them in at a 45 degree angle to skid trails where a Cat 518 rubber tire will grapple and skid doodles to landings with least amount of turning necessary. We will be placing sporax to all required stumps as directed. At that point a hydro log loader will sort the pile timber and trees. If log market provides opportunities to once again sell volumes of timber, we would gladly deliver logs to mills. The rest of the sub murch and small logs can be chipped and delivered to cogeneration plants in Carson City, NV and /or Loyalton and Quincy.

A brief description of each section and past performance of that type of work will be included in this technical approach under sections.

3.1 Forest Management Hand Crew Services Specification

Bordges Timber Inc has done both forest health projects and fuel reduction projects and thinning projects over our 32 years of business. Our road side salvage projects have had hand piling and view strips in them where we picked up logging slash, limbs, and chunks and piled them as well as removing brush and hand thinning 3 – 9 DBH trees. These trees were fell limbed, cut into 3 – 6 ft pieces and hand piled into a tee pee shape piles for burning. A fire line was dug around the pile to mineral soil. On steep ground a ditch was dug on the lower side of pile to catch any roll outs from going down the hill, where the pile was burned. Bordges Timber has also done dozer piling of slash and debris and excavator piling and thinning. We have used 320 & 325 size excavators with rakes and thumbs to chunk and remove small trees in plantation and pile them for burning as well as jack pot piling of debris around and between larger trees. The larger trees were not to be damaged and a fine of \$200 per tree was to be assessed, but there were none to be had. Bordges Timber has done wildlife improvement as well.

On the El Dorado National Forest Georgetown Road, we placed a dozer and excavator into Long Canyon creek and created fish holes by placing rocks onto other rocks to make pools for the fish. We also took the slide and placed water bars in and rechanneled the channel from straight to S turn to displace energy from the water. This work was done under the direction of the Forest Fish Biologist. Bordges Timber has also taken down red fur logs and other unmurchable trees and placed them into a lean two type of structure for bears to den into above Hell Hole Reservoir.

On some of our timber sales, there are nature nook areas of trees that we leave untouched for deer to fawn in and to get shelter in from the wind. Bordges Timber has worked on Sage Summit Hen with the Truckee Range District to do experimental stand improvement which follows the guidelines in GR220 where we leave 5 acres untouched and the outward from the center leaving a mosaic pattern of nature nooks which are separated by thin areas. All of Bordges Timber's temporary roads, skid travel and landings are closed according to contract specifications. We use outslopeing, water bars, trees and rocks as barriers, ditching, scattering wood debris or straw as filter strips for erosion control.

3.2 Large Tree Removal Services Specifications

3.2.12.1

Class A: 1 faller, transportation, buckler, person to sweep area for possible improvements that might be damaged, i.e.; Power lines under and above ground, water systems, septic systems. Plants and shrubs to be protected, Evaluate area for possible flying debris from trees, broken limbs, limbs from other trees or shrubs that may be brushed upon during falling, placement of safety signs and safety.

3.2.12.2

Class B: 1 faller climber, 1 ground person. This type of work requires the same approach as above with safety being our first concern i.e.; looking for possible hazards, rotten branches, bees, electrical lines, nails or metal in trees, impact on ground.

3.2.12.3

Class C: Bordges Timber will be happy to bid on a case by case basis. There are many variables, i.e.; height, slope, accessibility, existing hazards, fences, power lines, septic systems, irrigation systems and buildings. Mobilization for cranes is expensive. The distance could add significant cost as well as type of soil for stabilization and access to project.

3.2 Large Tree Removal

Bordges Timber Inc has completed many hazard tree removals from private grounds and USFS, S.M.U.D. and PG&E camp grounds. The tree removal around improvements is always a challenge. Septic systems, leach lines, pavement, water lines, BBQ's, fire boxes, picnic tables and barriers all had to be protected along with clean up of slash. In 2010, Bordges Timber did such a job on the Plumas National Forest, called Hopper Corral Stewardship. This project included Honker Gove and Grizzley Camp Grounds. Karen Newsted was the site administrator for the project. This project included whole tree removal and total clean up. All tops were chipped for bio mass and the slash was removed and piled for burning. The project was successful. We have done many campgrounds on the El Dorado National Forest, Pacific District with Don Errington at Ice House, Wench Creek and Jones Camp Grounds as well as PG&E 43 mile tract on Hwy 50 and SMUDA camp at Union Valley. For Sacramento Utility District we used hand fallers, jacks and mechanical equipment to perform the tasks. Some were trees taken down in sections or chunks. We have used tires stacked up to soften a tree crossing the pavement. We have climbed and roped trees for pulling or pushing and total clean up was performed.

3.3 - Forestry Equipment Specification

Our people have numerous years in the Timber and Construction industries. We have a Forester on staff. My operators know what a SMZ (stream management zone) and equipment limits. They are light on the land and have finesse at operating equipment. They can surgically remove trees without damage to other resources. They are aware of the dangers of flying debris, dust, compaction of soil issues as well as erosion issues. They have worked in and around archaeological sites with both limited and avoidance operations. They are familiar with USFS rules/regulations and Cal Fire rules/regulations as well as the State of Nevada Dept. of Forestry rules/regulations.

Bordges Timber has qualified timber operators to do forest health, logging, thinning and mastication projects. We provide a large range of equipment to do these changing projects. We have done meadow enhancement at 3 Ring Road for Nevada Safe Council. We have done Aspen stand improvement on the Plumas National Forest Thompson Aspen Stewardship. For Karen Newsted we have done forest health and thinning at Zepher Cove for Nevada Fire Safe Council. On the Larson National Forest, we have done 40 ac of brush piling using dozers, again on the Plumas N.F. we have done plantation thinning, using excavators with thumbs to thin and pile the trees. On the Plumas N.F. we thinned two campgrounds, Honker Cove and Grizzley Campgrounds. These campgrounds have numerous improvements that need protection and paved roads. We used rubber tracked equipment and machined felled the trees along with a hand feller, skidded the trees whole with rubber tire skidders and loaded the trucks with a rubber tire loader, then chipped all tops for bio mass and removed it. Bordges Timber's crew and operators are as follows Steve Skochko, Jon Thurlander, Dennis Turpin, Jeff Edwardson, Matt Bordges, Steve Chasen, Ray Romine, Juan Lopaz, Tim Bordges, Bret Gibford, Chase Ryan, Mike Bordges, Gordon Powers and Ron Keller. Many of these operators are cross trained on many different types of equipment.

At the end of each work day all roads, cut banks, ditches and trails will be free of debris. Bordges Timber Inc. will have at each project a project supervisor in charge of each project.

A project award notice or letter of authority will be in writing for each project along with equipment needed and man power. The project can be bid by the hourly rate for equipment needed or by project.

Equipment that may be utilized:

3.3.2.1 Tree Shear

- Cat. 277 faller buncher with 30" shear
- Timbco 425 faller buncher with 30" shear
- Cat. 287 ATV with 14" shear
- Cat 299 ATV with 14" shear
- Cat 277 ATV with 14" shear

The **Cat 277, 287, and 299** tree shear are ASV type of CAT skid steers. These rubber tracked type of skid steer perform best on flat or level ground. They can run on medium pitches of 20% but are not productive over 30% slope.

The tracked faller buncher **Timbco 425** and **CAT 722** have self leveling cabs. They can work on 40% slopes productively and pitches up to 50%. This equipment is specially designed to work on slopes. Both have single bar grozer tracks.

3.3.2.2 Brush Mastication (Light, Med & Heavy)

- Cat 320 excavator w/FAE drum
- Cat 320 FM excavator FAE drum
- Cat 325 excavator w/FAE drum

Cat 287 ATV w/FAE drum
 Cat 299 ATV w/ AFE drum
 Cat 277 ATV w FAE drum
 Timbco 425 w FAE drum
 Cat 722 w FAE drum

Cat 287, 299, 277 are rubber tracked skid steer machines with FAE drum type heads. They work best on light to medium fuel types and flat to level ground.

CAT 320,325 & 320 FM excavators have a reach of 18 – 20 ft steel tracks. They are 20-25 metric ton machines with FAE drum type heads. They work best on light and medium fuel loads. They have 24” street pads on them for ground pressure.

CAT 722 and **Timbco 425** are 30 – 35 metric ton machines which can work on slopes up to 50%. They are equipped with single bar grozers and a reach of 20ft. They work best in medium and heavy fuels.

3.3.2.3 Feller Buncher

Timbco 425 w/30” bar saw
 Cat TX 722 w/quadco hot saw or w/ 36” bar saw

3.3.2.4 Forwarders

John Deere 1210

John Deere 1210 rubber tire forwarder is a 6 wheel drive machine which carries the processed stems left behind from the 1270 procession. This machine loads itself with stems approximately 1/3 of a truck load and carries them out of the wood instead of skidding the stem on the ground, so there is less ground disturbance.

3.3.2.5 Cut to length operators

John Deere 1270

John Deere 1270 D with 480 Head. This rubber tire processor is a low impact type of equipment. It has 6 wheel drive with a squirt boom with water 480 head which grabs the stem. A bar saw severs the stem, we push or pull the stem into a horizontal position, then process the stem by delimiting it, and measuring it into log lengths. This process is done in the woods. The 1270 has a reach of 20’ with 270 degree rotation.

3.3.2.6 Heavy Cranes

LinkBelt HSP25

Linkbelt HSP 25 is a 25 ton rubber tire rough terrain crane capable of moving on and off roads. It has a 70’ boom with two drums capable of lifting 25 tons.

3.3.2.7 Wheeler skidders

Cat 518 w/100” log grapple rubber tire
 Cat 528 w/120” log grapple rubber tire
 Cat 525 w/100” log grapple rubber tire

Cat 528 is a rubber tire skidder with wench and 100’ log grapple. It has 174 HP with 24.5 x 32” tires. This is a large skidder capable of skidding whole trees up hill. The skidder can work on slopes 35 – 40 % straight up and down.

CAT 518 is a smaller version of the 528 with only 130 HP and 23 x 26 “ tires with wench and 100” log grapple. This skidder can also operate on slopes of 35 – 40 % straight up and down. These rubber tire skidders are friendlier on rocks than metal tracks

CAT 525 is a rubber tire skidder with wench and 100” log grapple. This machine has 165 hp with 24.5 x 32” tires. It can work on slopes 35 – 40%.

3.3.2.8 Tracked Skidder

Cat D5H tracked log skidder with 100” grapple and winch

Cat D7F

Cat 287

Cat D7F with 100 log grapple is a dozer with a log grapple capable of skidding timber along with road or skid road construction. It has 180 HP with 40ton capable of operation on 40 – 45 % slopes.

Cat D5 tsk is a D5 dozer custom built for log skidding with a longer track frame. It has a 100” log grapple and 6 way blade. This skidder has 145 HP and weighs 35 tons with 22 inch track pads and a ground psi of around 5 psi. This piece of equipment is light on the ground and produces a lot of production.

Cat 287 is a rubber tracked skid steer with log forks or grapple, good for low impact and close corners. It can run on streets, load trucks and skid logs. It has 90 HP and ground pressure around 3.5 psi and has 90 hp.

3.3.2.10 Chippers

Peterson 4310 grinder

Peterson 4310 chipper is a whole tree 800 HP tracked chipper capable of self mobility. It can produce up to 100T per hr. Wt is 30T, and has 18” single bar grozers.

Above equipment expensed by the hour and includes fuel, maintenance, operator and replacement of wear items.

Equipment transport, water for fire suppression and dust abatement will be negotiated on a project by project basis.

3.6 Hauling Services

Bordges Timber has done trucking since 1979, when Tim bought his 1st log truck. Since then Bordges Timber owns 5 trucks and numerous trailers. We move most of all our own equipment on our low beds. We use the 10 wheel dump for aggregate and logs. For brush and stump removal we have 30' end dumps, chip vans, walking floor trailers which unload themselves, log dollies, 40' log trailers, flat bed trailers and belly dumps. Bordges Timber plans to use Sierra Disposal for their container freight in 10- 20-30 yd containers.

Bordges Timber will drop off containers at designated project site. The container will be able to hold wood chips or wood stems or cord wood. The containers are available in 10 – 20 – 30 cubic yards. The cost of container will be determined by distance to drop point, tipping fee, length of time used and rental fee. We also propose to use dump trucks with large boxes (16' box) or chip van high cube or end dumps, high side or log trucks or log trailer 45' with 4 bunks or walking floor trailers for removal of products

Equipment that may be utilized:

Trucks:

- 79 KW log truck
- 79 KW water truck
- 91 Pete 3 axle truck
- 99 KW 3 axle truck
- 73 Mack 10 wheel dump truck 16' box

Trailers:

- 3 Log Dollies
- 2 Belly Dumps
- 2 Flat Bed Trailers
- 3 Lowbed Trailers
- 2 Chip Vans
- 1 45 ft Walking Floor Van
- 1 Dry Van

Bordges Timber will offer the State a price per cord based on wood type and amount and location on site by site basis.

Equipment transport, water for fire suppression and dust abatement will be negotiated on a project by project basis

3.9 Road Construction/Maintenance/Rehabilitation Specifications

Bordges Timber has been doing forestry and construction work since 1986. Most timber removal requires sale layout and planning during this process. The project area is defined; environmental issues are mapped and mitigated. Within most projects there are roads to be built, culverts to be installed, aggregate base to be placed, bridges to be installed and erosion control measures to be installed. Bordges Timber has completed 1 mile of new road construction for NDF at Spooner State Park, called Spooner Road. We installed water bars, out slope the road, did cut and fill work, added rolling dips, padded the existing road, rolled and compacted roadway, removed trees, stumps and installed a gate. Most roads are flagged prior to construction, draws are mapped, slopes and the grade of road are reviewed, obstacles are flagged, the timber is removed, and slash is piled or removed. The organic 2-4 inches of matter is removed or incorporated within the fills, slopes cut, low spots and draws are filled, culvert are placed, the road is watered and compacted, then final graded. Bordges Timber has built roads for PG&E, USFS, SPI, Michigan Cal, State of Nevada and other private people.

We are familiar with most all types of erosion controls devices i.e.; water bars, ditches, use of waldals, silt fence, straw or slash scattering rock filter strips, just to mention a few. We have done temporary crossings. Using logs we made log stringer bridges to haul over, French drains and used Geo Textile fabric in roadway and drains. We have installed new pipe gates and signs, placed concrete barriers, set box culverts and poured bridge embankments, placed rip rap constructed gabion basket. We have built engineered rock walls.

Bordges Timber has the following crew and employees available, Steve Skochko, Jon Thurlander, Dennis Turpin, Jeff Edwardson, Matt Bordges, Steve Chasen, Ray Romine, Juan Lopaz, Tim Bordges, Bret Gibford, Chase Ryan, Mike Bordges, Gordon Powers and Ron Keller. Many of these operators are cross trained on many different types of equipment.

Bordges Timber Inc. has performed road maintenance, road building, reconstruction of roads, and home /commercial building pads and campgrounds.

On most Forest service sales prehaul and post haul maintenance is required, ditch cleaning, cross blading, line of sight brushing, culvert cleaning, armoring rolling dips, putting up barricades. Rocking road with AB, repairing asphalt, both permanent temporary erosion work from seeding seeding and strawing slopes to spreading slash or chips on slopes.

We have had to cordaroy roads in the spring time to gain access to units. We have used geo-textile fabric with aggregate base over the top on native surface roads prior to applying AB.

We have experience with new road construction performing all aspects, right away clearing, staking, timber removal and grubbing. Construction of road bed and key ways compaction of material used, construction of rolling dips inside of ditches, french drains, culverts and downspouts.

Bordges Timber has built roads for Sierra Pacific Industries, USFS, and private land owners. Due to unknown types of projects our equipment rates are by the hour of operation. We are willing to lump sum bids or piece bid. We have additional equipment that may be used in construction maintenance or rehabilitation. All equipment is pressure washed for safety and weed abatement.

Equipment that may be utilized:

Back hoe

Cat 446-Rubber tire hoe

CAT 446 4x4 back hoe is a rubber tired tractor with a digging attachment on the rear and hydraulic stabilizers. It has an assortment of different size buckets from 12" to 48". Its weight is about 25 k lbs. It has a front end loader and bucket as well. The bucket is 3 cubic yds. The machine is 4x4 with an extension hoe

Roller

Cat 563, smooth drum roller, 84" drum w/vibration, floatation tires

CAT 563 smooth drum roller is an 84" smooth drum roller with vibration. It has 23' x 26' rear tires and approximately 90 hp. This machine is used to compact road surfaces.

Graders

Cat 12G – 12’ mulboard and rippers

Cat 143g all wheel drive grader, 12’ mulboard and wing front plow for snow

CAT 12G is a 6 wheel grader with a 12’foot mulboard and ripper on the rear. It articulates in the center, has power shift transmission, 14:00 x 24:00 rubber tires, hp of 125 and a push block on front to help push trees.

CAT 143 grader is a 6 wheel drive grader with a 12 foot mulboard and a ripper on the rear and push block on front, hp of 140. It has a power shift transmission and articulates in the middle.

Dozers

Cat D7H - semi U blade w/ripper

Cat 7G – full U dozer and ripper

Cat D5H tsk– 6 way dozer w/grapple

CAT D7 dozer is a 64 k lbs machine with 171 hp engine. It has rippers and semi U dozer 11” wide. The semi U allows user to carry soil further without losses.

CAT7G dozer is a 54 k lbs machine with 200 hp. It has rippers and a full U blade. Again this allows user to carry soil further with less loss

CATD5H tsk dozer is a 40 k lbs dozer with log grapple on rear to move timber and rocks. It is equipped with 10’ 6 way dozers which also are able to cut angles without setting the dozer at that angle. The dozer is a straight blader. This dozer works nicely for water bars.

Excavators

CAT 320 excavator w/ thumb & 36” bucket

CAT 325 excavator w/ thumb & 42” bucket

CAT 320 FM excavator w/ thumb & 36” bucket

Skid Steers

Cat 299

Cat 287

Skids steers with tree shears, grapple buckets and gp bucket

Wheeled Skidders

CAT 966B

CAT 966C

644 John Deere

CAT 966 rubber tire wheel loader is a 150 hp loader weighing about 48 k lbs. It has 26.5 x 29 tires. It has a power shift transmission. It articulates in the middle. We have both g/p bucket and log forks for this loader.

644 John Deere rubber tire loader in the weight class. This machine articulates in the middle and has a 3 yard g/p bucket. It also has a log fork available. It is mainly used to land or carry materials i.e. dirt and rocks.

Dump Trucks

Mack RL 700

Mack RL 700 10 wheeled dump truck has 430 hp engine with 15 speed transmission and 44 mack boggies. It is equipped with a 16 foot dumb box. It can carry 10 – 20 yds of material.

Belly Dumps

Our belly dumps are pulled by a 3 axle tractor. These trailers are 28' & 30' long. They can carry 18 – 22 yds of material. The gates are single and adjustable.

End Dumps

The end dumps are 30 – 35 foot. One is high sided or high cubic with a barn door at the rear. The other end dump has an air lift tail gate. We use these to transport brush, debris, rocks, firewood and logs.

There may be the need for other types of equipment which will be rented on a project by project basis. Equipment transport, water for fire suppression and dust abatement will be negotiated on a project by project basis

Tab VII Company Background & Business References

Section 4 Company Background and References

Bordges Timber Inc. is located at 4940 Old FrenchTown Road, Single Springs, CA 95682. Our contact phone numbers are office (530) 626-7930, Tim Bordges cell (530) 919-3711. Our corporate office is located in Diamond Springs which is 45 minutes west of Lake Tahoe. Employee's numbers vary with amount of work available. In the past Bordges Timber, Inc. had 24 employees and lately 3 to 4 over the last few years. To our knowledge Bordges Timber, Inc. has no civil, criminal litigations or any investigations pending.

Bordges Timber Inc. has been doing timber related work for 26 years. Formed in 1986 and incorporated in 1992, we began as a salvage logger taking dead and dying trees from campgrounds and roads in the national forest to being a Contract Logger for a number of sawmills:

- I.E Sierra Forest Products , Terra Bella, Ca
 - Larry Duson (559) 535-4893
- Wetsel Oviat Lumber, El Dorado Hills, Ca
 - Out of business
- Feather River Forest Products, Maryville, Ca
 - Out of business
- Michigan California Lumber, Camino, Ca
 - Out of business
- Georgia Pacific Corp., Martell, Ca
 - Out of business
- Sierra Pacific Industries, Lincoln + Camino, Ca
 - Dave Harkus (916) 645-1631 (in Lincoln)
- Basic Cascade, Medford, Or
 - Mark Blowers (541) 830-7903

As a Salvage Logger we would buy timber from the U.S. Forest Service to log and sell the logs to the mills. These timber sales would range from a few thousand dollars to hundreds of thousand dollars. One of our biggest sales was on the El Dorado National Forest Pacific Ranger Unit called In Living Color with gross revenues of 3 million estimated volumes of 12mbf. Don Errington of Pacific Ranger Unit was forest service representative on the above referenced sale. Bordges Timber has worked on the following National Forests:

- USFS Tahoe, NF
 - Tony Redarte (530) 367-2224
- USFS El Dorado, NF
 - Pat Farrel (530) 622-5061
 - Don Errington (530) 644-3349
- USFS Stanislaus NF
 - Carl (209) 795-1381
- USFS Sequoia NF
 - Pat Dauwalder(760) 376-3781
- USFS Plumas, NF
 - Karen Newsted (530) 836-2575

As a Contract Logger we worked for the saw mills on both U.S.F.S and private to cut and deliver logs to the mill. We are a licensed Timber operator LT A8195 as well as Small Business Certified 17786. We are familiar with the Forest Practice Rules and haven't had any violations in our company history. The company is insured and bondable; familiar with wood products. We have chipped wood for paper and biomass, masticated brush and plantations, mechanized logs to mills as far away as Oregon, and operated sort yards where we scaled and

graded logs for both domestic and foreign markets. We moved logs by boat, train, flatbed truck, and log trucks. In recent years, with the decline of our timber market and mill closures, Bordges Timber has been doing Fuel Management and Forest Health Stewardship projects.

Bordges Timber has the following equipment at its disposal:

- 4 log trucks
- 3 rubber tire loaders
- 1 track loader
- 2 tracked grapple skidders
- 2 rubber tire skidders
- 2 D7 dozers
- 1 266 rotor chopper horizontal grinder
- 2 excavators w/thumb
- 1 smooth drum roller
- 2 12g graders
- 2 3600 gallon water trucks
- 2 fire trailers U.S.F.S approved
- 4 low bed trailers
- 2 end dump trailers
- 2 belly dump trailers
- 1 flat bed with log stakes
- 1 D6n dozer
- 1 D5 dozer
- 4 lowbed trailers
- 1 backhoe
- 3 transportation vehicles

For many years Bordges Timber has helped Cal Fire, USFS and BLM to do fire suppression and fire line rehabilitation. In the last few years, this has been a big part of our business. We have worked for the Plumas Fire Safe Council, White Hawk Project, and the Nevada Fire Safe Council Sewer Plant Project. These jobs involved removing and sawing 12” or greater logs as well as masticating and chipping the remaining fuels.

COMPANY BACKGROUND AND REFERENCES

VENDOR INFORMATION

Vendors must provide a company profile in the table format below.

Question	Response
Company name:	<i>Bordges Timber Inc</i>
Ownership (sole proprietor, partnership, etc.):	<i>Inc</i>
State of incorporation:	<i>California</i>
Date of incorporation:	<i>1/08/1992</i>
# of years in business:	<i>26 years</i>
List of top officers:	<i>Tim Bordges</i>
Location of company headquarters:	<i>4940 Old French Town Road Shingle Springs CA 95682</i>
Location(s) of the company offices:	<i>4940 Old French Town Road Shingle Springs CA 95682</i>
Location(s) of the office that will provide the services described in this RFP:	<i>4940 Old French Town Road Shingle Springs CA 95682</i>
Number of employees locally with the expertise to support the requirements identified in this RFP:	<i>12</i>
Number of employees nationally with the expertise to support the requirements in this RFP:	<i>12</i>
Location(s) from which employees will be assigned for this project:	<i>4940 Old French Town Road Shingle Springs CA 95682</i>

Please be advised, pursuant to NRS 80.010, a corporation organized pursuant to the laws of another state must register with the State of Nevada, Secretary of State's Office, as a foreign corporation before a contract can be executed between the State of Nevada and the awarded vendor, unless specifically exempted by NRS 80.015.

The selected vendor, prior to doing business in the State of Nevada, must be appropriately licensed by the State of Nevada, Secretary of State's Office, pursuant to NRS76. Information regarding the Nevada Business License can be located at <http://sos.state.nv.us>.

Question	Response
Nevada Business License Number:	<i>NV20101680787</i>
Legal Entity Name:	<i>Bordges Timber Inc</i>

Is "Legal Entity Name" the same name as vendor is doing business as?

Yes	X	No	
-----	----------	----	--

If “No”, provide explanation.

Vendors are cautioned that some services may contain licensing requirement(s). Vendors shall be proactive in verification of these requirements prior to proposal submittal. Proposals that do not contain the requisite licensure may be deemed non-responsive.

Has the vendor ever been engaged under contract by any State of Nevada agency?

Yes	<i>X</i>	No	
-----	----------	----	--

If “Yes”, complete the following table for each State agency for whom the work was performed. Table can be duplicated for each contract being identified.

Question	Response
Name of State agency:	<i>State of Nevada Depart. of Conservation & Natural Resources Division of Forestry</i>
State agency contact name:	<i>Paul Carmichael</i>
Dates when services were performed:	<i>10/05/2011 to 6/2012</i>
Type of duties performed:	<i>Purchase Order #112176 – Spooner Logging Road – 1 mile long new road & ½ mile road to be improved, additional fill material, culverts and gates</i>
Total dollar value of the contract:	<i>\$74,250.00</i>

Are you now, or have you been within the last two (2) years, an employee of the State of Nevada, or any of its agencies, departments, or divisions?

Yes		No	<i>X</i>
-----	--	----	----------

If “Yes”, please explain when the employee is planning to render services, while on annual leave, compensatory time, or on their own time?

If you employ (a) any person who is a current employee of an agency of the State of Nevada, or (b) any person who has been an employee of an agency of the State of Nevada within the past two (2) years, and if such person will be performing or producing the services which you will be contracted to provide under this contract, you must disclose the identity of each such person in your response to this RFP, and specify the services that each person will be expected to perform.

Disclosure of any significant prior or ongoing contract failures, contract breaches, civil or criminal litigation in which the vendor has been alleged to be liable or held liable in a

matter involving a contract with the State of Nevada or any other governmental entity. Any pending claim or litigation occurring within the past six (6) years which may adversely affect the vendor’s ability to perform or fulfill its obligations if a contract is awarded as a result of this RFP must also be disclosed.

Does any of the above apply to your company?

Yes		No	<i>X</i>
-----	--	----	----------

If “Yes”, please provide the following information. Table can be duplicated for each issue being identified.

Question	Response	
Date of alleged contract failure or breach:		
Parties involved:		
Description of the contract failure, contract breach, or litigation, including the products or services involved:		
Amount in controversy:		
Resolution or current status of the dispute:		
If the matter has resulted in a court case:	Court	Case Number
Status of the litigation:		

Vendors must review the insurance requirements specified in *Attachment E, Insurance Schedule for RFP 1995*. Does your organization currently have or will your organization be able to provide the insurance requirements as specified in *Attachment E*?

Yes	<i>X</i>	No	
-----	----------	----	--

Any exceptions to the insurance requirements *must* be identified on *Attachment B, Technical Proposal Certification of Compliance with Terms and Conditions of RFP*. In order for any exceptions to the insurance requirements to be considered they must be documented in detail in *Attachment B*. The State will not accept additional exceptions and/or assumptions if submitted after the proposal submission.

Upon contract award, the successful vendor *must* provide the Certificate of Insurance identifying the coverages as specified in *Attachment E, Insurance Schedule for RFP 1995*.

Company background/history and why vendor is qualified to provide the services described in this RFP. Limit response to no more than five (5) pages.

Length of time vendor has been providing services described in this RFP to the public and/or private sector. Please provide a brief description.

Financial information and documentation to be included in Part III, Confidential Financial of vendor's response in accordance with *Section 9.5, Part III – Confidential Financial*.

---	--

Name:	Barry Callenberger Owner Wildland Rx	<input type="checkbox"/> Key Personnel
Classification:	# of Years in Classification:	
Brief Summary: of Experience:	<p>Barry Callenberger has been working in the field of Wildland Fire Management since 1972 first with the US Forest Service meeting all the requirements for a Type one burn boss and a Type I All Risk Deputy Incident Commander. He retired from the US Forest Service in 1997 as the Regional Prescribed fire specialist. In 1997 he went to work as the prescribed fire and fuels management Division Chief for NorthTree Fire International. In 2004 he opened his own consulting service Wildland Rx Inc. working as a prescribed fire and wildfire mitigation specialist teaching prescribed fire classes and writing burn plans for the US Forest Service, the Presidio of Monterey Fire Department and others</p> <p>WILDLAND Rx Based in the Sierra Nevada Mountains of California, we provide consulting services to those seeking a safer co-existence with wildfire. We use our personal experience as wildland firefighters, coupled with modern mapping and planning tools, to develop mitigation strategies for communities at risk of wildfire. Our products include wildland fire behavior analyses, Community Wildfire Protection Planning, project implementation, expert witness testimony, and wildland fire training. These services lead to development of strategies and tactics to reduce the losses from wildfires to natural resources and private property. We also provide training courses as a course coordinator and instructor for wildland fire courses covering both prescribed fire and wildfire suppression operation positions.</p> <p>Full Service Wildfire Hazard Mitigation We provide vegetation fuel loading assessment and documentation, fire behavior modeling, documentation of wildland fire hazards, wildfire risk mapping and GIS mapping services. <i>WILDLAND Rx</i> provides a full suite of wildfire mitigation services to communities at risk of wildfire in the wildland urban interface. We cover all aspects of hazard mitigation - from planning to implantation. Our plans make recommendations on fuel reduction treatment options, describe types of equipment available to treat wildland fuels, and include lists of contractors that will provide the best service for hazardous fuels reduction. We can also provide project management and monitoring services.</p>	
# of Years with Firm:	8 years
